pandeymrinalani02@gmail.com

[LinkedIn](#) [Github](#)

**Dynamic** and **results-driven** Full Stack Developer with a passion for creating visually appealing, user-friendly, and effective websites. Seeking to leverage **versatile** technical skills, creative **problem solving** abilities, and passion for delivering exceptional **user experiences**, while continuously learning and growing professionally.

### EXPERIENCE

#### Web Developer Intern

Aug 2024 - present

Lightning Technology

- **Developed responsive interfaces** using **React** and **Tailwind CSS**, enhancing user experience and performance across multiple devices.
- **Developed RESTful APIs** with **Node.js**, managed data with **MongoDB**, and implemented **transactions** to ensure data consistency and integrity across multiple database operations
- **Collaborated** with **cross-functional teams**, leveraging **Git** for version control and participating in **code reviews** to deliver high-quality, maintainable code.

### SKILLS

- |              |              |              |           |
|--------------|--------------|--------------|-----------|
| • JavaScript | • TypeScript | • Express.js | • MySQL   |
| • React.js   | • Next.js    | • Redux      | • MongoDB |
| • Node.js    | • HTML & CSS | • Socket.io  | • Postman |

### PROJECTS

#### Group Chat Application

Jan 2024 - Aug 2024

- Created a real time web application where a user can register themselves, login, create groups, create group admins, and can chat.
- Implemented multimedia chat using Amazon S3 as storage. Optimized the chat app by moving everyday message to archive by running Cron job everyday.
- Utilized the event-driven library Socket.IO to enable bi-directional communication.

#### Expense Tracker

Oct 2023 - Jan 2024

- Developed a full-featured Expense Tracker App with user authentication (JWT) and secure credential encryption (hashing), including sign-up/login, password reset via Node Mailer, and pagination for expenses.
- Integrated Razorpay for premium account upgrades and implemented a download feature using AWS S3 for secure expense data storage.

#### Linked-In Clone

Sep 2024 - Present

- Building a LinkedIn clone using React, Node.js, MongoDB, and Tan Stack, featuring user profiles, post creation, and real-time interactions. Implemented secure authentication, data management, and an optimized feed with efficient querying and state management using Tan Stack tools.

### EDUCATION

Bachelor of Commerce

### LANGUAGE

English, Hindi

### ACHIEVEMENTS

250+ DSA Problems
